

I would just like to say that XM Satellite Radio is the BEST THING TO HAPPEN TO BROADCASTING SINCE THE INVENTION OF RADIO!!!!!!!!!! I travel thousands of miles a year and without XM I would be falling asleep listening to other local stations.

The weather and traffic information is vital to me and can be found with a "Click". This save time punching around for local stations and is ultimately SAFER, since I don't have to surf the airways.

To limit this type of information from XM or any other Satallite broadcasting would be a great loss. Don't stop XM Traffic & Weather.

Sincerely,

Joe Arnold
